EXPERIENCE

JUNE 2019 – PRESENT

SOFTWARE DEVELOPER, YASH TECHNOLOGIES

- Designed Terraform templates to automate health data collection from Apple Watch, and utilized AWS Kinesis, S3, Glue, Elastic BeanStalk, DynamoDB, Lambda, and QuickSight to process and serve the collected data into reports.
- Orchestrated end-to-end TFS migration to Azure DevOps including designing CICD pipelines.
- Designed an ARM template to automatically process employee records using Azure LogicApp.
- Managed Docker containers with Kubernetes and deploy the pods on Azure DevOps portal and AWS ECR & EKS.
- Developed REST API with Spring MVC.

MAY 2018 – AUGUST 2018

IT INTERN, MINNESOTA VALLEY ELECTRIC COOPERATIVE

- Developed web database and CSV comparator applications with Django web framework.
- Developed web based new hire forms with HTML, CSS, and JavaScript.
